👤 ACADAMY PROJECTS

- 2/12/2022 - 26/12/2022
HOSTEL MANAGEMENT SYSTEM
We can create the hostel management system use of java's GUI. Use a database management system(DBMS) like MySQL or SQLite to store and retrieve data related to hostels, rooms, bookings, and other relevant information. JDBC(java database connectivity)can be used to establish a connection between NetBeans and the database
- 5/12/2023 - Present
VISUAL SORTING ALGORITHM
We can use HTML, CSS, JAVASCRIPT. Algorithm visualization is illustrating how algorithm works in a graphical way. It mainly aims to simplify and deepen the understanding of algorithms operations. The web application represents data in the form of bar graph and user will be able to selection algorithm control and speed of visualization and control the size of bar graph.

🌟 CERTIFICATIONS
